- Capstone project entitled “Automated Kebele Management System”. (finished with the completion rate of more than expected).

2019

- Solve IT 2019 competition participation certificate. (issued by, with the incorporation of US Embassy, JICA and iCog Labs) April,2018
- CCNA Routing and Switching. (from CICSO)

## SUMMARY

I am 2019 graduate student from Hawassa university in the field of computer science. I have participated in every program that requires programming ability in our campus. Because programming is not like work for me rather it is just my hobby. I like to lead the rest of my life with the occupation of programmer.

I am all rounded programmer with website development, android & windows application development, maintenance and networking. I have the ability to adapt new programming languages and new technologies within short period time.

I have a self-Motivation to accomplish task before dead line. And also I have willingness to work extra hours, a capacity to perform tasks under pressure and independently.
